

## About Info Edge

InfoEdge's mission is to create world-class platforms that transform lives by continuously innovating. Our products and services are built keeping our customers in mind. We always delight our customers by delivering superior value through enhanced offerings on the internet and other platforms. Through our continuous investment across various businesses, especially in cutting-edge technology, machine learning and artificial intelligence (AI), we have built a robust system that constantly increases our predictive powers on customer behaviour, and optimizes and improves our systems. Our various teams tirelessly work together to solve problems, innovate, and create something to empower our customers.

At Info Edge, people are our core competitive advantage and we will continue doing all that is needed to attract and retain the best available talent.

### Job Description:

- You will be expected to build complex business applications as a member of high-energy teams provided with excellent mentorship.
- With excellent mentorship you will be encouraged to build software independently and take them live from development to deployment on production environment.
- Apply SOA concepts to build micro services for highly scalable applications.
- Using MVC frameworks, OOPs concepts, data structures to build modular and loosely coupled applications components.
- Participate in the entire lifecycle of the product - design, documentation, coding, testing and deployment.
- Imbibe and maintain a strong customer service oriented attitude while designing and building products.
- Work and get exposure on various cutting edge technologies including Java, Spring, PHP, MySQL, NOSQL, MongoDB, Nodejs, MemCached, Aerospike, Spark, Lucene, Elasticsearch, Symfony, Nginx, MVC Frameworks and many other upcoming internet technologies

### Required Skills:

- Expert level knowledge of Computer Science fundamentals – Data Structures, Algorithms and Complexity Theory
- Expert level coder in any language
- Good working knowledge and comfort with working on Linux.
- Good understanding of how the Internet works in general.
- Good understanding of database concepts.

Branches to connect with : IT / CS/ ECE

### Why Join us:

This is a unique opportunity to work on innovative and disruptive technologies that are shaping the future of the industry. We are looking for candidates who are willing to work passionately in a fast-paced environment and are ready to enhance their skills by learning something new. Being a part of the InfoEdge team, you will be engaged in innovations, product development, integration with mobile and social media, technology, research and development, quality assurance, sales and marketing.
