A student pursuing a degree in Information Technology at NIT Raipur, I am expected to graduate in 2025 and look forward to bringing my skills to your innovative supply chain compliance solutions. I am always excited about the projects it gets to work on within the Life Sciences sector. Moreover, I feel that my strong passion for software development and proficiency in languages like Python, Java, and JavaScript are assets to your team. Through academic and personal projects alike, my foundation in software engineering started to materialize: from feature development down to testing and debugging. The activities involve working comfortably on cross-functional teams and managing many tasks within fast-paced environments. What excites me particularly is the recent Series B funding of Qualifyze and their plan for US expansion; this sounds just great, and I am ready to contribute to it. Thank you for considering my application. I am looking forward to the opportunity to discuss how I can support your team and further drive the success of Qualifyze's digital solutions. Sincerely, Chetan Kumar Patel
